

Rohaan Ashraf

AI Full Stack Engineer

rohaanashraf2001@gmail.com | +92 329 7280829 | linkedin.com/in/rohaanmughal | github.com/rohaan1829

PERSONAL STATEMENT

Full Stack Engineer who designs, builds, and ships AI-powered web applications end-to-end: React, Next.js, and TypeScript on the frontend, Node.js and Python on the backend. Integrates LLM features, APIs, and automation into real products, and uses AI coding tools daily with judgment: plan, prompt, review, test, then ship.

EDUCATION

FAST National University of Computer & Emerging Sciences

Sep 2021 – Dec 2025

BS in Computer Science

Faisalabad, Pakistan

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, Java

Frontend: React, Next.js, React Native, HTML5/CSS3

Backend & APIs: Node.js, Express.js, Python, REST APIs, Authentication, Webhooks

AI / LLM: Claude (Claude Code), GPT, Prompt Engineering, LLM Feature Integration, NLP

Databases & Tools: PostgreSQL, MongoDB, Firebase, Git, GitHub Actions, Postman, CI/CD, Agile/Scrum

EXPERIENCE

Associate Software Engineer, Infinitiv.AI

Nov 2025 – Present

- Built and shipped 3+ full-stack web apps for AI-driven products across React/TypeScript and Node/Python.
- Integrated LLM/AI features and third-party APIs into production apps, shipping working features, not demos.
- Designed REST APIs and data models; used AI tools daily to ship faster, reviewing and testing all output.

Full Stack Developer, CorexTech

Jun 2025 – Nov 2025

- Built full-stack features and reusable modules for an email-marketing automation platform.
- Implemented REST API integrations with a clean, modular structure for better maintainability.
- Led client requirement-gathering sessions and translated business needs into shipped features.

PROJECTS

SleuthQuest sleuthquest.com

Next.js, TypeScript, Node.js, PostgreSQL

- Designed and shipped a full-stack interactive mystery platform where users create branded, detective-style quests and immersive puzzle experiences for communities, customers, and events.
- Built it end-to-end with Next.js, TypeScript, Node.js, and PostgreSQL: a customizable quest builder, gamified storytelling flows, and a responsive multi-device experience.
- Took it from concept to a live product, making AI-assisted decisions across design, build, and testing.

FirstAidTag firstaidtag.ca

React Native, Python, NFC, AI

- Built an AI-powered medical-health band: a React Native app that stores a user's medical profile and syncs health data to a physical NFC tag.
- Developed a Python backend for AI-driven health tracking, syncing phone-collected data back to the wearable.

SmartFormGen: Automated Form Drafter

JavaScript, GPT API, Automation

- Built a browser-based tool that parses web forms and auto-fills them using custom GPT prompts.
- Turned a repetitive manual task into an automated workflow, cutting form-entry time for users.
